SYSTEM AND METHOD FOR PRESENTA-TION INTEGRITY

Abstract

A system for presentation integrity may include an encrypter to encrypt formatting data associated with information content data. A formatter may be included to decrypt the encrypted formatting data and to format the information content data in a predetermined format based on the decrypted formatting data. A method for presentation integrity may include decrypting encrypted formatting data associated with information content data and formatting the associated information content data in the predetermined format based on the decrypted formatting data.
